LaunchGuard Readiness Report

TARGET URL	https://example.com
SCAN ID	–
GENERATED	2026-06-03 08:29 UTC

Launch Verdict

Blocked

1 confirmed launch blocker must be fixed before shipping.

Next action: Fix the launch blockers, rotate any exposed credentials where needed, then run a verification scan.

Scan profile: Controlled Security Audit. Security-focused scan using configured passive and active checks.

Top launch actions

Blocked: Downloaded artifact matched ClamAV signature

85/100

LaunchGuard Score

Medium Risk

Executive Summary

1 security issue was detected across this scan. These findings should be reviewed and remediated promptly.

Malware Artifacts	1

OWASP Top 10 2021 – Coverage Summary

The table below shows which OWASP Top 10 2021 categories were evaluated in this scan and whether findings were detected.

Category	Status	Findings	Scanners Run
A01:2021 – Broken Access Control	Not Tested	0	—
A02:2021 – Cryptographic Failures	Covered	0	ssl
A03:2021 – Injection	Covered	0	sqli
A04:2021 – Insecure Design	Covered	0	malicious
A05:2021 – Security Misconfiguration	Not Tested	0	—
A06:2021 – Vulnerable and Outdated Components	Issues Found	1	malware_analysis
A07:2021 – Identification and Authentication Failures	Not Tested	0	—
A08:2021 – Software and Data Integrity Failures	Not Tested	0	—

This report was automatically generated. Review with qualified security professionals.
False positives may occur. Manual testing is recommended for critical systems.

Category	Status	Findings	Scanners Run
A09:2021 – Security Logging and Monitoring Failures	Not Tested	0	—
A10:2021 – Server-Side Request Forgery	Not Tested	0	—

Coverage is based on the scan profile used. 'Not Tested' categories were not included in this scan.

Detailed Findings

✓ **SQL Injection Analysis**
No issues detected

✓ No SQL injection vulnerabilities were detected.

✓ **SSL/TLS Certificate**
Valid certificate

✓ **HTTP Header Security**
No issues

✓ No HTTP header misconfigurations detected.

— **WordPress Security**
Not a WordPress site

No WordPress installation detected on this target.

— **OWASP ZAP Analysis**
Not enabled

OWASP ZAP was not run in this scan environment.

— **Nikto Web Server Scan**
Not available

Nikto was not run in this scan environment.

✓ **Malicious Content Analysis**
No threats detected

✓ No malicious indicators detected.

— **Cross-Site Scripting (XSS)**
Not run

XSS scan was not run in this scan.

— Technology Fingerprinting
Not run

Technology fingerprinting was not run in this scan.

— Sensitive File Exposure
Not run

Sensitive file exposure scan was not run.

— Hardcoded Secrets & API Keys
Not run

Hardcoded secrets scan was not run.

✗ Downloaded Artifact Malware Analysis
1 malware-related finding

Downloaded artifact matched ClamAV signature — Critical

{'engine': 'clamav', 'signature': 'Win.Test.EICAR'}

- Remove suspicious downloads from production.

— DNS Security (SPF / DMARC / DKIM)
Not run

DNS security scan was not run.

— Open Redirect
Not run

Open redirect scan was not run.

— Subdomain Takeover
Not run

Subdomain takeover scan was not run.

— Server-Side Request Forgery (SSRF)
Active checks disabled

SSRF active probing was disabled for this scan. Enable active checks to test for SSRF vulnerabilities.

— Security Logging & Monitoring
Not run

Logging & monitoring scan was not run.

This report was automatically generated. Review with qualified security professionals.
False positives may occur. Manual testing is recommended for critical systems.

Authentication Controls
Not run

Authentication controls scan was not run.

Software & Data Integrity
Not run

Software integrity scan was not run.

Conclusion & Recommended Next Steps

1. Malware Artifacts	Remove suspicious downloads, verify artifact integrity, and only publish signed release files from trusted CI.

Developer Best Practices

- Only publish signed, verified release artifacts from a trusted CI pipeline and malware-scan downloads before every release.
- Use authenticated code review and protected branches even for AI-generated code; fast generation increases the need for release guardrails.
- Add pre-production checks for secrets, dependency risk, headers, and exposed debug routes before every deployment.

Report Limitations

LaunchGuard performs automated security, UX, accessibility, SEO and reliability checks against the approved target and selected pages. A READY TO SHIP verdict means no configured launch-blocking issues were detected during this scan. It does not guarantee the application is free of vulnerabilities, accessible in every scenario, or protected against future failures. High-risk applications handling payments, personal data, or sensitive workflows should undergo additional manual security review.
