LaunchGuard Readiness Report

TARGET URL	https://portfolio-rakinzi.vercel.app/
SCAN ID	–
GENERATED	2026-06-03 10:14 UTC

Launch Verdict
Blocked

1 confirmed launch blocker must be fixed before shipping.

Next action: Fix the launch blockers, rotate any exposed credentials where needed, then run a verification scan.

Scan profile: Passive Product Readiness. Rendered-page checks for accessibility, mobile UX, performance, SEO, forms, and optional AI visual review.

Top launch actions

Blocked: Interactive controls must have accessible names

65/100 LaunchGuard Score — Critical Risk

Executive Summary

29 security issues were detected across this scan. These findings should be reviewed and remediated promptly.

OWASP Top 10 2021 – Coverage Summary

The table below shows which OWASP Top 10 2021 categories were evaluated in this scan and whether findings were detected.

Category	Status	Findings	Scanners Run
A01:2021 – Broken Access Control	Issues Found	2	app_controls
A02:2021 – Cryptographic Failures	Not Tested	0	—
A03:2021 – Injection	Not Tested	0	—
A04:2021 – Insecure Design	Not Tested	0	—
A05:2021 – Security Misconfiguration	Covered	0	exposed_services
A06:2021 – Vulnerable and Outdated Components	Not Tested	0	—
A07:2021 – Identification and Authentication Failures	Not Tested	0	—
A08:2021 – Software and Data Integrity Failures	Not Tested	0	—
A09:2021 – Security Logging and Monitoring Failures	Not Tested	0	—

This report was automatically generated. Review with qualified security professionals.
False positives may occur. Manual testing is recommended for critical systems.

Category	Status	Findings	Scanners Run
A10:2021 – Server-Side Request Forgery	Not Tested	0	—

Coverage is based on the scan profile used. 'Not Tested' categories were not included in this scan.

Detailed Findings

✓ SQL Injection Analysis
No issues detected

✓ No SQL injection vulnerabilities were detected.

✗ SSL/TLS Certificate
Certificate issue detected

Certificate Issue — High

Invalid or untrusted certificate

- Obtain a trusted certificate (Let's Encrypt is free)
- Use TLS 1.2+ with strong cipher suites
- Enable HSTS
- Set up automatic certificate renewal

✓ HTTP Header Security
No issues

✓ No HTTP header misconfigurations detected.

— WordPress Security
Not a WordPress site

No WordPress installation detected on this target.

— OWASP ZAP Analysis
Not enabled

OWASP ZAP was not run in this scan environment.

— Nikto Web Server Scan
Not available

Nikto was not run in this scan environment.

This report was automatically generated. Review with qualified security professionals.
False positives may occur. Manual testing is recommended for critical systems.

✓ Malicious Content Analysis
No threats detected

✓ No malicious indicators detected.

— Cross-Site Scripting (XSS)
Not run

XSS scan was not run in this scan.

— Technology Fingerprinting
Not run

Technology fingerprinting was not run in this scan.

— Sensitive File Exposure
Not run

Sensitive file exposure scan was not run.

— Hardcoded Secrets & API Keys
Not run

Hardcoded secrets scan was not run.

— Downloaded Artifact Malware Analysis
Not run

Downloaded artifact malware analysis was not run.

— DNS Security (SPF / DMARC / DKIM)
Not run

DNS security scan was not run.

— Open Redirect
Not run

Open redirect scan was not run.

— Subdomain Takeover
Not run

Subdomain takeover scan was not run.

— Server-Side Request Forgery (SSRF)
Active checks disabled

This report was automatically generated. Review with qualified security professionals.
False positives may occur. Manual testing is recommended for critical systems.

SSRF active probing was disabled for this scan. Enable active checks to test for SSRF vulnerabilities.

— Security Logging & Monitoring
Not run

Logging & monitoring scan was not run.

— Authentication Controls
Not run

Authentication controls scan was not run.

— Software & Data Integrity
Not run

Software integrity scan was not run.

Pre-production Controls Summary

Control	Value
Active checks	disabled
Request budget	8
Auth test accounts	0 supplied (redacted)
Protected paths	0
IDOR templates	0

✗ Accessibility
16 issues

Interactive controls must have accessible names — High

The interactive control <button aria-label="Toggle menu"> (nav:nth-of-type(1) > div:nth-of-type(1) > button:nth-of-type(

Confidence: Measured

Tap target is too small on mobile — Medium

<button aria-label="Toggle theme"> at `nav:nth-of-type(1) > div:nth-of-type(1) > button:nth-of-type(1)` is 32×32px, belo

Confidence: Measured

Tap target is too small on mobile — Medium

<button aria-label="Toggle menu"> at `nav:nth-of-type(1) > div:nth-of-type(1) > button:nth-of-type(2)` is 28×21px, below

Confidence: Measured

Tap target is too small on mobile — Medium

<button aria-label="Previous"> at `div:nth-of-type(3) > div:nth-of-type(2) > button:nth-of-type(1)` is 36×36px, below th

This report was automatically generated. Review with qualified security professionals.
False positives may occur. Manual testing is recommended for critical systems.

Confidence: Measured

Tap target is too small on mobile — Medium

<button aria-label="Slide 1"> at `div:nth-of-type(2) > div:nth-of-type(1) > button:nth-of-type(1)` is 8×8px, below the 4

Confidence: Measured

Evidence Screenshot 1: Interactive controls must have accessible names

Evidence Screenshot 2: Tap target is too small on mobile

- Run measured accessibility checks before each release candidate and treat missing labels on key flows as launch blockers.
- Ensure headings, labels, and focus states remain usable on both desktop and mobile viewports.
- Use explicit labeling and valid ARIA relationships instead of relying on placeholders or visual context.

✓ **Mobile and Responsive UX**
No issues

✓ **No issues detected in this category.**

This report was automatically generated. Review with qualified security professionals.
False positives may occur. Manual testing is recommended for critical systems.

✗ Performance UX

1 issue

Total page transfer size is too large

Medium

Transfer Size (KB) was 4709 (threshold: 2000). | total_transfer_kb: 4709 (threshold: 2000)

Confidence: Measured

Evidence Screenshot 1: Total page transfer size is too large

- Use Lighthouse for repeatable mobile performance budgets in release readiness checks when available.
- Optimize largest above-the-fold assets and reduce render-blocking JavaScript.
- Re-run performance checks after each major design or dependency change.

✓ Form and Interaction Usability

No issues

✓ No issues detected in this category.

✗ SEO Readiness

6 issues

robots.txt is missing or unreachable

Low

https://portfolio-rakinzi.vercel.app/robots.txt did not return a non-empty 200 response.

Confidence: Measured

sitemap.xml is missing or unreachable

Low

https://portfolio-rakinzi.vercel.app/sitemap.xml did not return a non-empty 200 response.

Confidence: Measured

This report was automatically generated. Review with qualified security professionals.
False positives may occur. Manual testing is recommended for critical systems.

Canonical URL is missing — Low

No link[rel="canonical"] tag was found.

Confidence: Measured

Structured data is missing — Recommendation

No script[type="application/ld+json"] block was found.

Confidence: Measured

Open Graph metadata is incomplete — Low

Missing Open Graph fields: image.

Confidence: Measured

- Create unique titles, descriptions, canonicals, and H1s for each launch page.
- Add robots.txt, sitemap.xml, and relevant JSON-LD before indexing public pages.
- Validate social previews before launch so shared links look trustworthy.

✗ Broken Links

4 issues

Broken link detected — Low

Link target https://takainsure.demo.com/ failed: ConnectionError. | status_code: ConnectionError (threshold: <400)

Confidence: Measured

Broken link detected — Low

Link target https://image-seeker.demo.com/ failed: ConnectionError. | status_code: ConnectionError (threshold: <400)

Confidence: Measured

Broken link detected — Low

Link target https://marketplace.visualstudio.com/items?itemName=yourextension failed: HTTP 404. | status_code: 404 (thre

Confidence: Measured

Broken link detected — Low

Link target https://www.linkedin.com/in/rakinzi-silver/ failed: HTTP 999. | status_code: 999 (threshold: <400)

Confidence: Measured

- Fix or remove same-origin links that return 4xx/5xx responses before launch.
- Review external broken links because they reduce user trust and can interrupt conversion flows.

This report was automatically generated. Review with qualified security professionals.
False positives may occur. Manual testing is recommended for critical systems.

Broken Link Evidence

Source	Target	Status	Reason
https://portfolio-rakinzi.vercel.app/	https://takainsure.demo.com/		ConnectionError
https://portfolio-rakinzi.vercel.app/	https://image-seeker.demo.com/		ConnectionError
https://portfolio-rakinzi.vercel.app/	https://marketplace.visualstudio.com/items?itemName=yourextension	404	HTTP 404
https://portfolio-rakinzi.vercel.app/	https://www.linkedin.com/in/rakinzi-silver/	999	HTTP 999

Link Check Summary

Checked	Broken
11	4

✗ Application Controls

2 issues

No MFA signal detected on rendered auth pages — Low

Rendered pages did not include common MFA/OTP/authenticator language.

Confidence: Heuristic

No email-verification signal detected — Low

Rendered pages did not include common email-verification language.

Confidence: Heuristic

- Review discovered JavaScript and OpenAPI endpoints before launch.
- Provide two staging test accounts to enable deeper authenticated and IDOR checks.
- Protect upload, webhook, callback, dashboard, and admin routes with server-side controls.

Form Safety Matrix

Selector	Class	Method	Testing
form:nth-of-type(1)	general	GET	bounded

✓ Exposed Services

No issues

✓ No issues detected in this category.

Open Services

Host	Port	Risk	HTTP/Banner
portfolio-rakinzi.vercel.app	80	informational	Vercel
portfolio-rakinzi.vercel.app	443	informational	Vercel

Port Check Scope

This report was automatically generated. Review with qualified security professionals.
False positives may occur. Manual testing is recommended for critical systems.

Ports Checked
22, 80, 443, 2222, 3000, 3306, 3389, 5000, 5173, 5432, 6379, 8000, 8080, 8443, 9200, 1025, 8025

✓ Visual UX Recommendations

No issues

✓ No issues detected in this category.

Conclusion & Recommended Next Steps

No priority remediation steps identified.

Developer Best Practices

- Run mobile accessibility checks on every release candidate and treat missing labels and inaccessible controls as launch blockers.
- Track mobile performance budgets for key landing and signup pages so regressions are caught before launch.
- Use authenticated code review and protected branches even for AI-generated code; fast generation increases the need for release guardrails.
- Add pre-production checks for secrets, dependency risk, headers, and exposed debug routes before every deployment.

Report Limitations

LaunchGuard performs automated security, UX, accessibility, SEO and reliability checks against the approved target and selected pages. A READY TO SHIP verdict means no configured launch-blocking issues were detected during this scan. It does not guarantee the application is free of vulnerabilities, accessible in every scenario, or protected against future failures. High-risk applications handling payments, personal data, or sensitive workflows should undergo additional manual security review.

AI visual review is advisory. Screenshot-based recommendations are not confirmed technical failures.
