LaunchGuard Readiness Report

TARGET URL	https://example.com
SCAN ID	–
GENERATED	2026-05-28 08:50 UTC

! **Launch Verdict**
Blocked

1 confirmed launch blocker must be fixed before shipping.

Next action: Fix the launch blockers, rotate any exposed credentials where needed, then run a verification scan.

Scan profile: Controlled Security Audit. Security-focused scan using configured passive and active checks.

Top launch actions

Blocked: Downloaded artifact matched ClamAV signature

85/100

LaunchGuard Score

Executive Summary

1 security issue was detected across this scan. These findings should be reviewed and remediated promptly.

● Malware Artifacts	1

Detailed Findings

✓ **SQL Injection Analysis**
No issues detected

✓ No SQL injection vulnerabilities were detected.

✓ **SSL/TLS Certificate**
Valid certificate

✓ **HTTP Header Security**
No issues

✓ No HTTP header misconfigurations detected.

This report was automatically generated. Review with qualified security professionals.
False positives may occur. Manual testing is recommended for critical systems.

— **WordPress Security**
Not a WordPress site

No WordPress installation detected on this target.

— **OWASP ZAP Analysis**
Not enabled

OWASP ZAP was not run in this scan environment.

✓ **Malicious Content Analysis**
No threats detected

✓ No malicious indicators detected.

— **Cross-Site Scripting (XSS)**
Not run

XSS scan was not run in this scan.

— **Technology Fingerprinting**
Not run

Technology fingerprinting was not run in this scan.

— **Sensitive File Exposure**
Not run

Sensitive file exposure scan was not run.

— **Hardcoded Secrets & API Keys**
Not run

Hardcoded secrets scan was not run.

✗ **Downloaded Artifact Malware Analysis**
1 malware-related finding

Downloaded artifact matched ClamAV signature — Critical

{'engine': 'clamav', 'signature': 'Win.Test.EICAR'}

• Remove suspicious downloads from production.

— **DNS Security (SPF / DMARC / DKIM)**
Not run

This report was automatically generated. Review with qualified security professionals.
False positives may occur. Manual testing is recommended for critical systems.

DNS security scan was not run.

Open Redirect
Not run

Open redirect scan was not run.

Subdomain Takeover
Not run

Subdomain takeover scan was not run.

Conclusion & Recommended Next Steps

1. Malware Artifacts	Remove suspicious downloads, verify artifact integrity, and only publish signed release files from trusted CI.

Developer Best Practices

- Only publish signed, verified release artifacts from a trusted CI pipeline and malware-scan downloads before every release.
- Use authenticated code review and protected branches even for AI-generated code; fast generation increases the need for release guardrails.
- Add pre-production checks for secrets, dependency risk, headers, and exposed debug routes before every deployment.

Report Limitations

LaunchGuard performs automated security, UX, accessibility, SEO and reliability checks against the approved target and selected pages. A READY TO SHIP verdict means no configured launch-blocking issues were detected during this scan. It does not guarantee the application is free of vulnerabilities, accessible in every scenario, or protected against future failures. High-risk applications handling payments, personal data, or sensitive workflows should undergo additional manual security review.
