Web Vulnerability Scanner - Security Report

Scan Date: 2025-05-07 16:51 UTC

Target Information

Scanned URL: http://localhost/web/

Executive Summary

Total vulnerabilities found: 6
- SQL Injection vulnerabilities: 6

Overall Risk Rating: Critical

Detailed Scan Results

SSL/TLS Analysis:

✓ Valid SSL/TLS certificate found

SQL Injection Analysis:

✗ SQL Injection vulnerabilities found: 6
Vulnerability 1:
Type: Form
Severity: Critical
Parameter: Unknown
Vulnerability 2:
Type: Form
Severity: Critical
Parameter: Unknown
Vulnerability 3:
Type: Form
Severity: High
Parameter: Unknown
Recommendations:
- Use parameterized queries or prepared statements
- Implement input validation and sanitization
- Apply least privilege principle for database users

Malicious URL Analysis:

✓ URL not identified as malicious
Threat Score: 0/10

This report was automatically generated and should be reviewed by security professionals.
False positives may occur. Additional manual testing is recommended for critical systems.
